📁 Projects

FYP (Smart Study Buddy)

Developed a mobile app to help students manage study schedules, track progress, and access study materials efficiently. Implemented features such as task reminders, study analytics, and resource recommendations.

School Management System

Developed a website showcasing school information, student and staff details, and fee structures.

Hotel Management System

Implemented OOP principles to manage different classes for hotel attributes.

COVID 19 Simulators

This was just the UI of the covid app which contains several information about covid.

Call center Networking

Designed a network hierarchy for a call center, facilitating agent communication.
